- **Roof Truss Layout** for engineered truss designs. Engineer stamped truss designs recommended.
- **Heating, Ventilation and Air Conditioning** information including heat loss calculations, duct design and duct layouts.
- **Electrical** (I.C.I buildings only)
- **Plumbing** (I.C.I buildings only)

Building Permit Notes

Drawings and Application

- All drawings are to be done by a qualified designer with a valid BCIN (except for exemptions as outlined under sections 2.17.4.1.(3)(4) and 2.17.5.1.(2) of the OBC)
- All applications deemed to be incomplete will be rejected prior to review and will need to be resubmitted for issuance of building permit.

Permits

- The Ontario Building Code Act and the Township of Malahide Building By-law prescriptively prohibit construction of a building without a permit being issued by the Chief Building Official. As such please be advised that if a person undertakes to commence construction of a building prior to the issuance of a building permit, permit fees may be doubled in accordance with the Ontario Building Code, Ontario Building Code Act and the Township of Malahide Building By-law.
- Permits shall be posted at all times during construction or demolition in a conspicuous place on the property where the work is being done.

Inspections

- It is the responsibility of the owner of the property where the construction is taking place to give notice of all required inspections at least 24 hours prior to the event.
- Framing inspection will not be completed and approved if roof truss layout with engineer stamped roof truss designs and floor joist layout is not on site at time of inspection. Plumbing and HVAC rough-in work to also be completed prior to framing approval.
- No person shall occupy a building or part of it unless the Chief Building Official has issued a permit authorizing occupation of the building or part of it.

Lot Grading

- Section 9.14.6.1(1) Surface Drainage of the Ontario Building Code states that "The building shall be located or the building site graded so that water will not accumulate at or near the building and will not adversely affect adjacent properties."
- Under Canadian Law, those that "collect and discharge" water are liable for its affect. Thus, the water that is collected from building (roofs and eavestroughs) must be discharged so as to not adversely affect adjacent properties.
- To ensure these obligations are met, the Township requires Lot Grading Plan. The lot grading plan must be prepared by a Professional Engineer, Landscape Architect or an Ontario Land Surveyor who is covered by insurance to undertake such work.
- Under certain conditions, the Township may exempt an applicant from having to provide a plan where it can be clearly demonstrated by the application that a plan is not warranted. Exempting an applicant from the requirement to submit an engineered plan, does not exempt the applicant from their obligation under the Ontario Building Code and/or their legal obligations.
