AND THAT Dave Mennill be appointed Chairman.

The Drainage Engineer, George Vereyken, of Spriet Associates, briefly outlined the Court of Revision process and what is to be discussed relates to the distribution of costs and no other matters. The total cost of the project can't be reduced overall. The costs can only be moved from one landowner to another. There have been no written appeals submitted but if there are any verbal appeals to be submitted, the landowner needs to present an explanation of why these assessments are not fair and where they believe this cost should be distributed to. The Court of Revision members are the only members who can ask questions and other members of Council should not participate in the conversation. Since there have been no written appeals, if the Court is willing to hear verbal appeals, now is when these would be submitted.

Chair Mennill inquired if any written comments/objections had been received and was advised that there were none.

Chair Mennill inquired if anyone wished to make comment regarding their assessment.

Mr. Dohner stated that he believes prior to discussing costs the project details need to be figured out. Chair Mennill asked if he was appealing the cost. Mr. Dohner stated that the entire project is too expensive and is wrong. Chair Mennill inquired if Mr. Dohner was making a verbal appeal and if he was he had to state this to the members of the Court. Mr. Dohner stated that yes, he was submitting a verbal appeal.

Chair Mennill inquired if anyone else wished to make comment that was in attendance. Mr. Passmore inquired if the cost allocation being discussed tonight is based on the report as it's currently written. Chair Mennill confirmed this understanding to be accurate. Mr. Passmore stated that based on the report as currently written, he has no objection to the cost allocation. Mr. Passmore noted that there is an appeal process going through the tribunal and his concerns will be addressed through that process.

Richard Jones a landowner assessed on the drain was also present for the discussion but had no comment.

Mr. Vereyken provided the nature of the proposed drainage works and the related Assessment Schedule.

Chair Mennill asked if any of the Court of Revision Members had any questions or comments for the Engineer and there were none.

The Court of Revision members exited the room to deliberate the information they had been presented and the verbal appeal that was presented.

The members after a brief absence, returned to the table with a decision.

Clerk Adams stated that if dissatisfied with the decisions of the Court of Revision which were pronounced the 16th day of June, 2022, landowners may appeal this decision to the Agriculture, Food and Rural Affairs Appeal Tribunal by filing a notice of appeal with the Clerk of the Township within 21 days of the date of this decision. If any appeals are submitted, a tribunal will be scheduled to review these appeals. The Tribunal has the power to fix costs of the hearing and award them against a party to the hearing. Where decisions of the Tribunal may be appealed, the appeal is heard by the Drainage Referee.

The Mayor asked Mr. Vereyken to provide an overview of the tribunal process. Mr. Vereyken although doesn't speak on behalf of the tribunal but rather from what he has experienced is that all appeals submitted at both the Meeting of Consideration and the Court of Revision are compiled and a decision will be made at how to best address the appeals.

The Mayor thanked the landowners in attendance as well as Mr. Vereyken and they retired from the meeting.

- Asset Management Plan Update

Asset Management Analyst Jones provided an overview of the presentation prepared in regards to asset management planning for the Township. Asset Management Analyst Jones stated that core assets are required to be completed by July 1, 2022 and that the full plan will be provided before the 2023 budgetary process. Ms. Jones provided an overview of asset inventory and current level of service in regards to roads, bridges and culverts, water, and wastewater. Director of Public Works Sweetland provided an overview of the lifecycle activities of the previously mentioned services. Director of Finance Boylan provided a funding forecast overview for this plan.

Asset Management Analyst Jones stated that although this update was triggered by a legislative requirement, the intent is to make the asset management plan a live document, in order to provide council, staff, and the public with the most current information. Continuously pursuing opportunities for improvement, such as including previously omitted assets, will allow this document to be used as a tool during the annual budgetary process and for future grant opportunities. Annual status reviews with

Council will also illustrate the progress being made. The next steps include submission of the updated core-asset plan to the province, updating the plan for all other assets, and presenting the budget committee with the full plan for the 2023 budgetary decision making process.

Deputy Mayor Giguère provided her appreciation for this presentation as it provides a strong rationale as to the inventory, analysis and targets. She also referenced that with this type of information the Township has a case that's evidence driven to do certain things as you can't change a plan if you don't have a plan.

There has always been push back about cleaning up the beach but an agreement for keeping the area 1/3 recreational and 2/3 natural was established.
